PROFESSIONAL SUMMARY

Java Full Stack Developer fresher (BCA 2026) with hands-on project experience building secure, role-based web applications using **Java, Spring Boot, Spring Security (JWT), Spring Data JPA/Hibernate, REST APIs, React.js and MySQL/PostgreSQL**. Built **3 full-stack projects** with JWT authentication, role-based access control (Admin/User/Case Worker) and cloud deployment. Seeking an entry-level Java Full Stack Developer role.

TECHNICAL SKILLS

Languages: Java (17/21), SQL, JavaScript (ES6), HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring Cloud (Eureka, API Gateway), Microservices, REST APIs, JWT, Servlets, JSP, Maven

Frontend: React.js, Vite, Tailwind CSS, Bootstrap, Axios, AJAX

Databases: MySQL, PostgreSQL

Tools & DevOps: Git, GitHub, Postman, Docker, IntelliJ IDEA, Eclipse, Spring Tool Suite (STS), VS Code, Netlify, Render

Concepts: OOP, MVC, Authentication & Authorization, Role-Based Access Control (RBAC), CRUD, Exception Handling, Input Validation

PROJECTS

Integrated Eligibility System (IES) - Government Benefits Platform

Self-built full-stack eligibility system modeled on a US state DHS-style platform with Admin and Case Worker roles.

- Implemented **Spring Security with JWT** authentication and role-based authorization using **@PreAuthorize** and **@EnableMethodSecurity**
- Designed User, Plan, Applicant and Case Detail entities using **Spring Data JPA** and **MySQL**
- Built dynamic case-creation forms for SNAP, CCAP, RIW, Medicaid, Medicare and QHP plans, plus a filterable reports module for admins
- Created an **Axios** API client with JWT interceptor and an AdminRoute guard to protect admin-only React routes

Tech Stack: Java 17, Spring Boot 3.2.5, Spring Security, JWT, Spring Data JPA, MySQL, React, Vite, Axios

College Admission & Inquiry Management System

Self-built full-stack application replacing manual admission paperwork with a digital admin-approval workflow.

- Developed **REST APIs** with Spring Boot and Hibernate, including input validation and exception handling
- Built a responsive React.js frontend, student inquiry form, Admin Panel and a **QR code scanner** that opens admission forms from inquiry data
- Implemented admin approval before admission confirmation and role-based access for Admin and Student
- Deployed frontend on **Netlify**, backend on **Render**, with **Neon PostgreSQL** as the cloud database

Tech Stack: React.js, Java, Spring Boot, Hibernate, REST APIs, PostgreSQL, Git, Netlify, Render

Car Rental Management System

Self-built full-stack application for searching, booking and managing rental vehicles, with an admin dashboard.

- Implemented user registration and **JWT login** with role-based access (Customer and Admin)
- Built car search/filter, booking, cancellation and booking-history features
- Designed **REST APIs** with Spring Boot and MySQL via Hibernate/JPA; tested APIs with **Postman**
- Developed a responsive React.js frontend with reusable components

Tech Stack: Java, Spring Boot, Spring Security, JWT, Hibernate, MySQL, React.js, Bootstrap

EDUCATION

BCA (Bachelor of Computer Applications) - Swami Ramanand Teerth Marathwada University, 2026 | CGPA: 7.75/10
HSC (XII): 79% | SSC (X): 80.20%

CERTIFICATIONS

- Java Full Stack Developer - I-Rise Software Training Institute (Java, Spring Boot, Spring Security, Hibernate, JPA, REST APIs, Microservices, React.js, MySQL, PostgreSQL, Docker, Git)
- AI Skills Passport - EY & Microsoft
- LLM for Young Developers (Foundational) - NASSCOM FutureSkills Prime, Meta & AICTE, Jan 2026
- Enterprise Design Thinking Practitioner - IBM SkillsBuild, Jan 2026
